

Glenwood Plant Tour & Seminar

CMU Manufacturing Facility and Brickyard

INTRODUCTION

The Glenwood Family of Companies would like to invite you to participate in our plant tour program located at our 500'000 sqft facility in Brooklyn

This seminar will cover the process of collecting CO₂ from NYC buildings and injecting it back into CMU using carbon sequestration technology (Carbon Cure). In addition, the importance of using recycled materials such as ground glass pozzolan (GGP) Pozotive and other environmentally focused efforts of the manufacturing process will be discussed. During the seminar attendees will tour our CMU plant to witness the production of concrete masonry units, observe the carbon cure process and discuss strategies for selecting CMU and concrete brick for shape, durability, performance and sustainability. Included is a tour of our clay brick facilities and relieving angle options area featured in the Glenwood Smart Wall.

WHO SHOULD ATTEND

The event is exclusively for **Brooklyn AIA Members**

DATE / TIME / LOCATION

October 1st, 2021 Starting at 9:00 AM

The Glenwood Masonry Supply and Manufacturing Facility, 4100 Glenwood Road, Brooklyn, NY 11210

CONTINUING EDUCATIONAL CREDITS

Our Masonry Manufacturing Facility program is worth **3** (HSW) AIA-CES credits. We will issue participation certificates for continuing education for all disciplines.

SPACE IS LIMITED

Since this is an active manufacturing facility and Covid precautions are still in effect attendance will be restricted to 12 participants.
